Al BOOST Optimal Electricity Cost & Active Safety

FusionSolar Residential Smart PV Solution

O1 Company Introduction

FusionSolar Residential Smart PV Solution

03 Summary

Sustainable business growth with large operation scale & diversed business groups

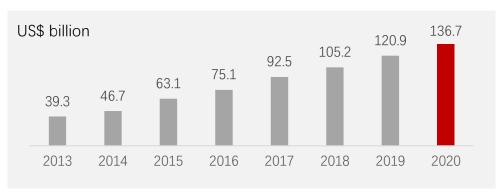

2020 Sales Revenue US\$136.7 Billion

Huawei Digital Power: Leading Energy Digitalization for A Smart and Sustainable World

Digital Power

No.1 and 29.3%
Market Share
Source: Frost & Sullivan

DC Facility

Provides power supply and distribution systems, cooling system and management system for data center

No. 1 and 25.1% Market Share in China

Source: Frost & Sullivan

Smart PV

Provides PV controller and management system for PV plants

2015-2020 No.1 Market Share Source: IHS Markit

mPower

Provides Power system, Charging system and battery management system for electric vehicles

1st for the DC Charging Module Conversion Efficiency

Source: State Grid Electric Power Research Institute.

Modular Power Supply

Provides Embedded power supply and adapter for ICT and terminal devices

Leading in Power Density, Efficiency & Reliability

Leader in ICT Digital Power Infrastructure

Leader in New Energy Digital Electronics

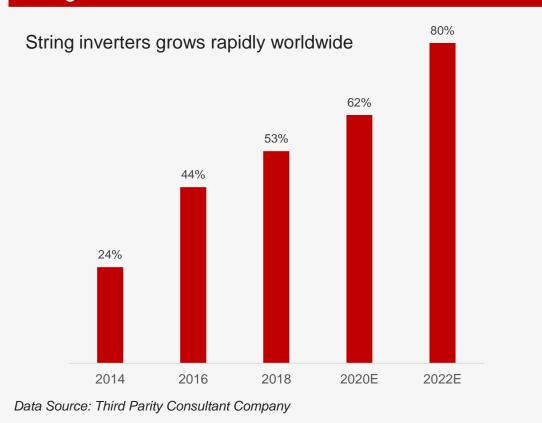

Leader in Embedded Power Supply

Cumulative 160GW+ Global Sipments, Leading String Solution to become the Mainstream

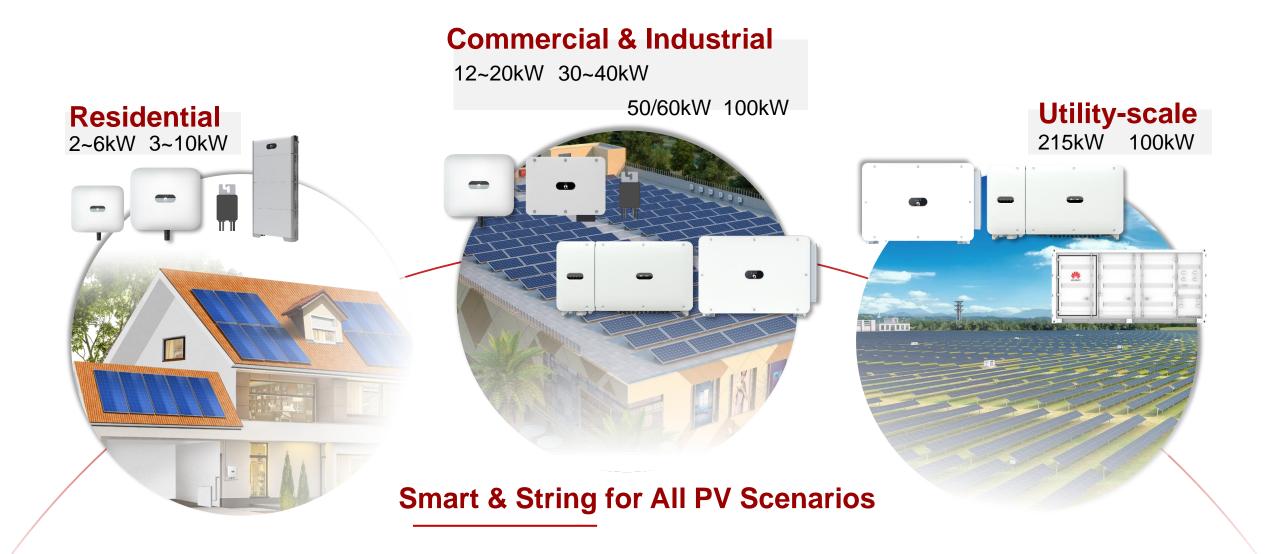

The Leading Brand for Global Inverter Shipment

String Solution Becomes the MAINSTREAM in PV Industry

Leading Smart String Solution for All PV Scenarios

O1 Company Introduction

PusionSolar Residential Smart PV Solution

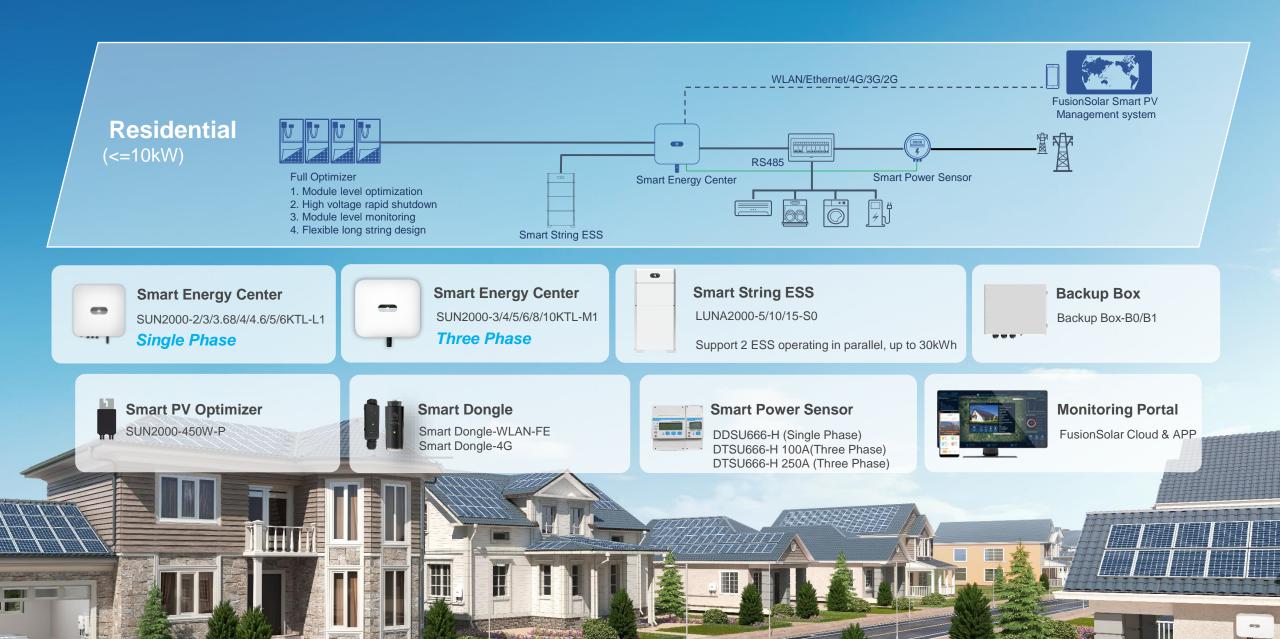

03 Summary

FusionSolar Residential Smart PV Solution

FusionSolar Residential Smart PV Solution

Optimal Electricity Cost

Active Safety

Better Experience

Generate more PV energy for **daytime** consumption

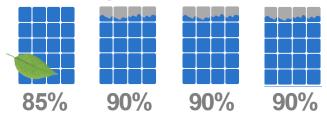

Store more PV energy for nighttime consumption

Maximized PV Power Self-Consumption

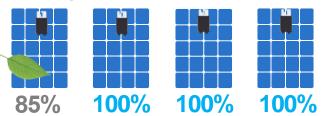

Up to 30%

More Energy by Optimizing Each Module's Performance

Without optimizer

With optimizer

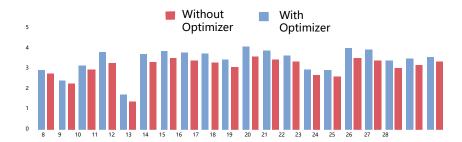

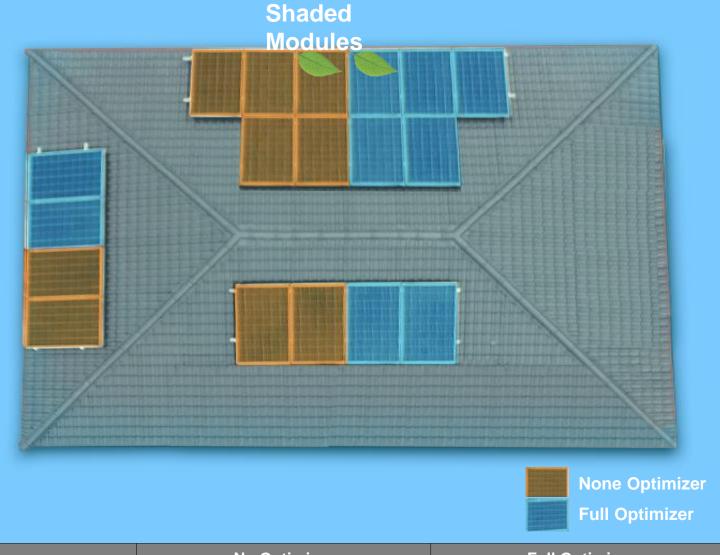

Comparison Case of Energy Yields

Full optimizer system generates average 10%-13% more energy per day than no optimizer system

	No Optimizer	Full Optimizer
PV Module	2,205 Wp	2,205 Wp
Optimizer	N/A	9x SUN2000-450W-P
Inverter 1x SUN2000-2KTL-L1 1x SUN2000-2KTL-L1		1x SUN2000-2KTL-L1

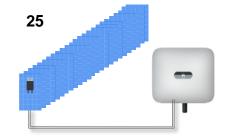

More Modules

with Long & Flexible String Design

Comparison Case

-Max. 200% DC/AC oversizing for SUN2000-5KTL-L1 & 10KTL-

VI		SUN2000-2-6KTL-L1	SUN2000-3-10KTL-M1
	imum DC er per string	5,000 W	10,000 W

Smart String ESS

with Energy Optimizer

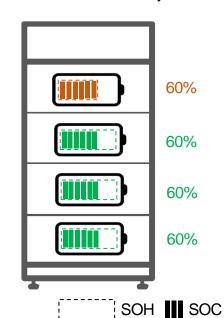

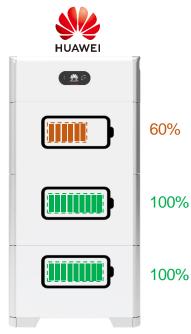

A string of battery modules for flexible expansion

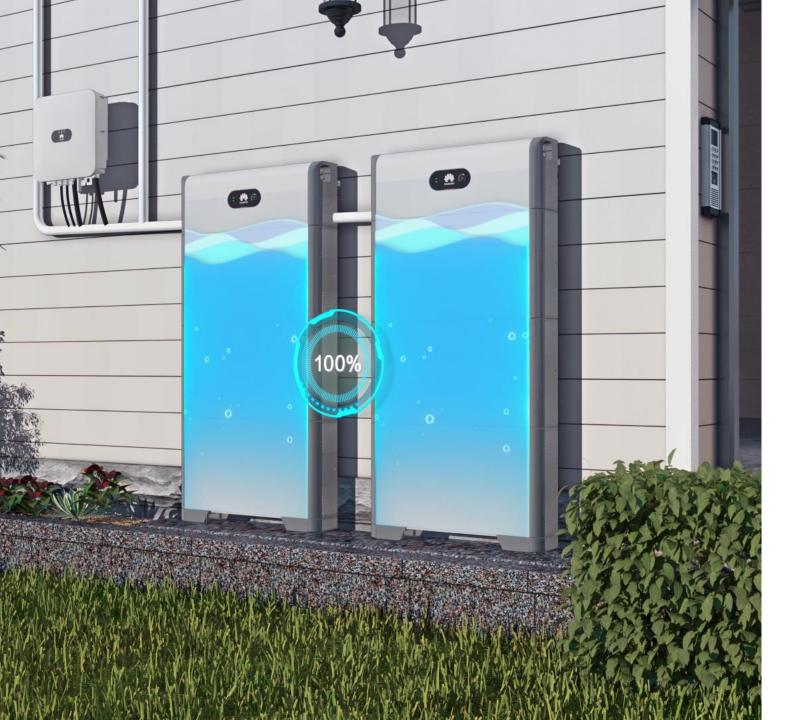

Energy optimizer to manage charge/discharge per module independently, supports new and old battery module mixed in one system without usable energy restriction

Other Modular Battery

5-30kWh ESS

50kg Battery Module

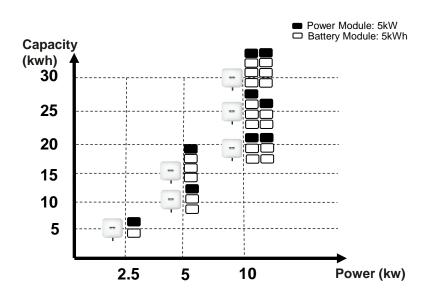

Easy for two people installation without extra lift tools

100% DoD

100% depth of discharge, use as much energy as you pay for

Parallel Operating

Supports Max 2 Storage System Operating in Parallel, 5-30kWh

2x POWER Battery Ready For More Energy

A 5KTL inverter allows **5KW** full power AC output plus **5KW** full power battery charge.

More Daytime Consumption

Inverter output full power for daytime energy consumption

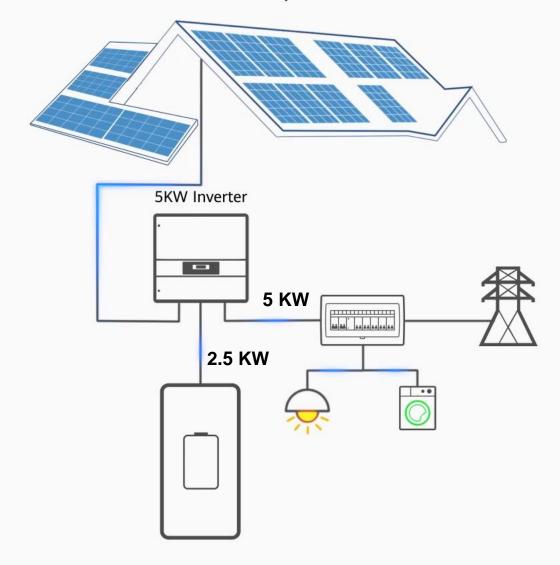

More Nighttime Consumption

 Inverter chargers ESS at full power for more nighttime energy consumption

Other PV + Storage Solution 10 KWp PV

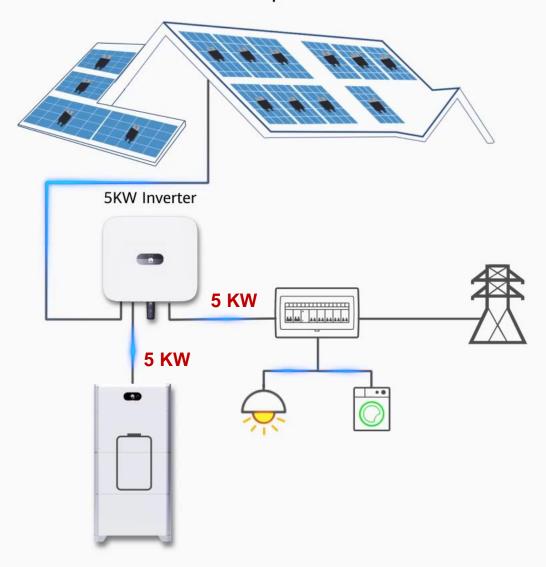

Battery Energy: 15 kWh

HUAWEI 2x POWER Battery Ready 10 KWp PV

Battery Energy: 15 kWh

Optimal Electricity Cost

Active Safety

Better Experience

Electric Arcing Is Threatening the Safety of PV System & Underlying Buildings

What is it?

 electrical breakdown of air that produces an prolonged electrical discharge

What causes Electric Arcing?

- Unreliable soldered joints within modules
- Broken PV cables
- Loosen PV connectors

What is the harm?

Can reach temperature of over 3000°C & easily start a fire

Al Powered Active Arcing Protection

What is AI Powered AFCI?

 HUAWEI inverter keeps self-learning new arc feature to accurately protect system from arc fault, even under complex noise

Self-learning new arc features with Al model

Accurate arc fault detection via local neural network algorithm

Speedy arc fault protection by inverter shutdown in 0.5s

Dc Arc Detection Of PV System (AFCI) TUV Technical Reports (IEC 63027 Draft)

SUN2000-2-6KTL-L1

Comparison	Adaptable Maximum Arc Current	Shutdown Time	Arc Energy	Arc Detection Accuracy	Pinpoint Arc Fault Positioning
IEC Standard	lmax (only 318V)	< 2.5 S	750 J	100%	Not Require
Huawei	Imax (All Voltage Range)	< 0.5 S	500 J	100%	Support*

Huawei AFCI Performance Test Results

Projects

Detectable Arc Type

Series Arc

Detectable Arc Fault
Position

System Mode

With Or Without Optimizer

Pinpoint Arc Fault
Positioning

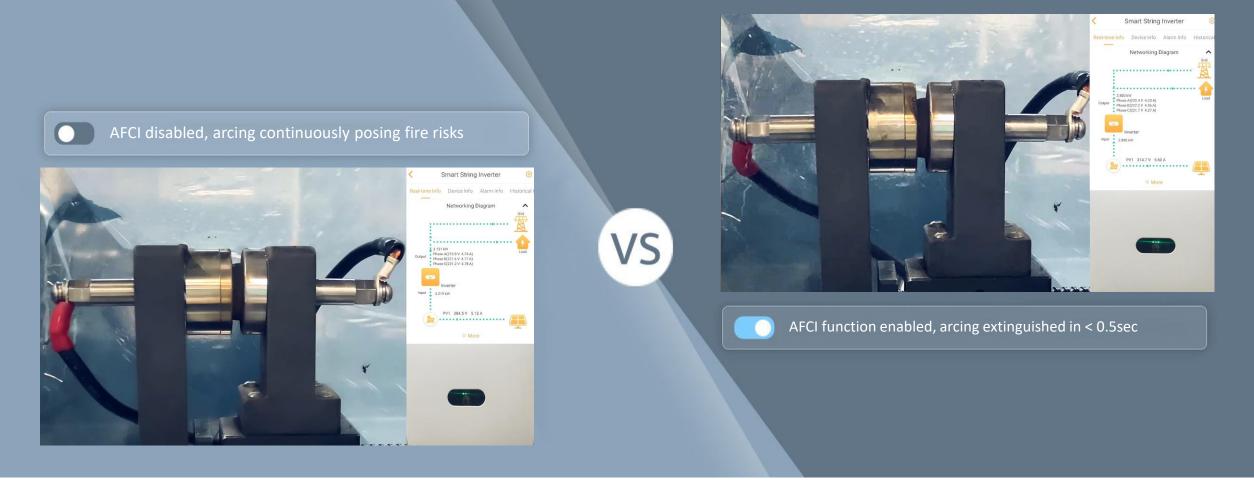

Support*

- 1) Meets the IEC 63027 Drafts (TUV Technical Reports).
- 2) Meets the UL 1699B-2018 Standard.

Projects	Results
Adaptable Maximum Arc Current	lmax
Arc Detection Accuracy	100%
Arc Energy	< 500 J
Shutdown Time	0.5 S

SUN2000-3-10KTL-M1

AI BOOST

PV Arcing with/without AFCI Comparison

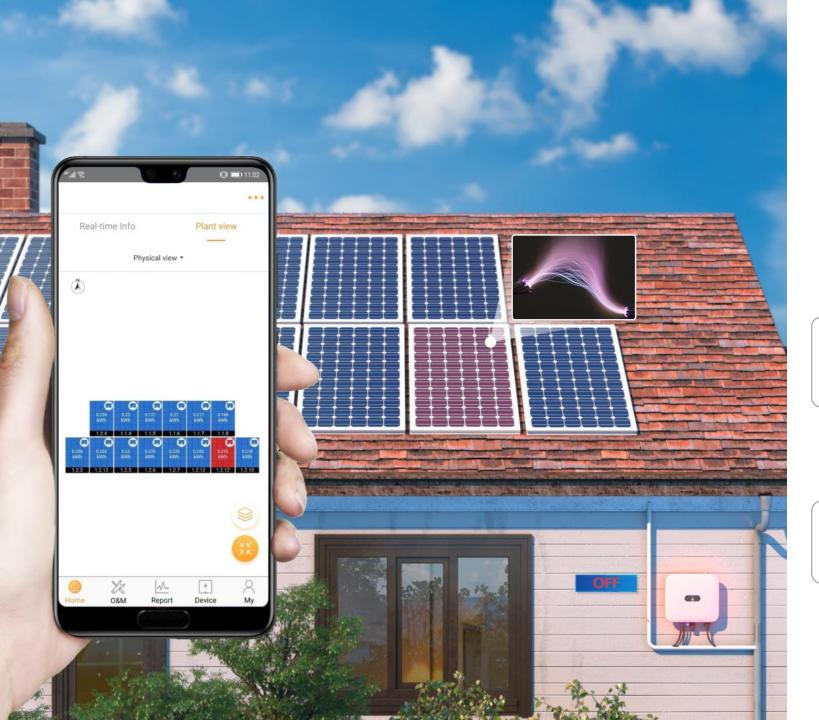

Safe House with Smart PV Optimizer

Without optimizer: High DC voltage when system shuts down

With optimizer: Each optimizer outputting OV when system shuts down

Pinpoint

Arc Fault Positioning for Easier Troubleshooting

Saving 80% onsite troubleshooting time and cost with accurate arc fault positioning

* Manually detection of DC arc fault in a 10KWp residential system usually costs 5hrs. Pinpoint arc fault position report lead to resolve the problem within 30 mins.

Less power loss because of shorter system tripping

3-Layer Protesion Battery Cell Battery Module Energy Storage System

Cell Level Protection

• Lithium iron phosphate cell for safe and stable performance

Pack Level Protection

• 8 sensors per pack to supervise operating status

15kWh Battery	HUAWEI	Α	В
Sensors per pack	3 x 8 = 24	3	4 x 4 = 16

System Level Protection

- Faulty pack auto isolation, touch safe
- Compliance to the most rigorous safety standard VDE2510

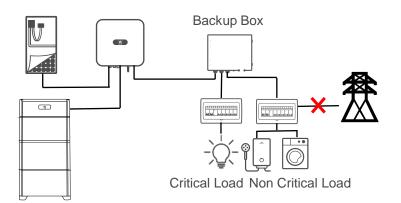

No Worry About Power Outage With Backup Power

System switches to backup mode to supply emergent power to critical load automatically when power outage

Smart string ESS supports black start from blackout to restore system operating

Optimal Electricity Cost

Active Safety

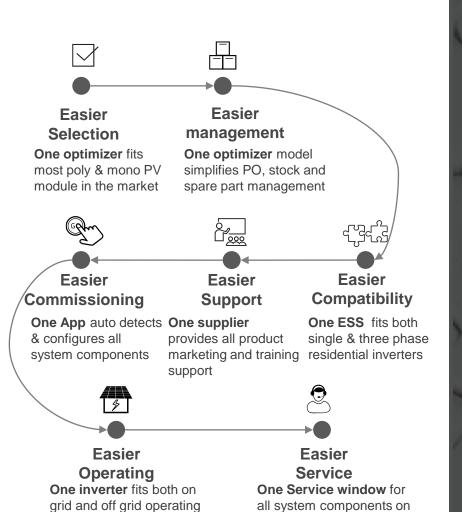

Better Experience

One-Fits-All

Solution, Easier Business

(via backup box).

pre & after sales.

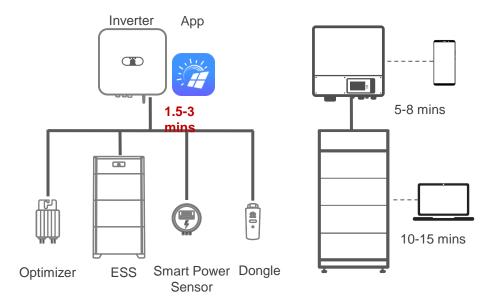

Auto Detection of All System Devices

All inverter connected devices can be automatically detected in FusionSolar app

	HUAWEI Solution	Other Solution
System	1.5-3 mins	15-20 mins
Setting up	(Device Auto Detected in	(Separated Apps or web tools
Duration	App)	to add devices manually)

<5sec Module Auto-Mapping

Operating Steps	HUAWEI Solution	Other Solution s
2D barcode paste on template	Same	Same
Physical layout creation	<5sec (Al powered)	6.5min (manual)
Total configuration time	<1min	6.5min

@15KW system with 40 pcs of PV modules

Saving 86% configuration time compared with other solutions

Flexible Communication & Power Control for All Scenarios

Social Housing

Power Purchase Agreement

Apartment Roof

TUV verified: annual failure rate < 0.5% Inverter availability up to 99.996%

Station Phase II, 200 units, 963 running days Failure Rate:

0.189%

Station Phase Ⅲ, 4939 units, 583 running days Station Phase IV.

Failure Rate:

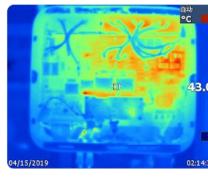

1790 units, 207 running days

0.390%

Failure Rate:

0.252%

High efficient thermal design to ensure low temperature within enclosure
